EDUCATION

Ulsan National Institute of Science and Technology, *Ulsan, South Korea*
B.S. in Computer Science & Engineering
Global UNISTAR Gold Scholarship (Full tuition fee + 800$/month)

SKILLS

Extensive experience with implementing data structures and algorithms in C++ through competitive programming
Experienced with Git, Python (Django), HTML/CSS, JavaScript and iOS Development (Swift 3)

HONORS

Silver medals in International Olympiad in Informatics 2015 and 2016
Absolute winner of National Olympiad in Informatics 2014, 2015 and 2016
TOP-4 in ACM ICPC Semifinals 2017
TOP-30 in **Hackerrank Leaderboard**

ACTIVITES & EXPERIENCE

Back-end programmer (treespero.com)
  Experienced working with back-end under the guidance of main back-end programmer, while learning Python (Django), PostgreSQL in parallel

Competitive programming
  Solved 3000+ problems and participated in 500+ programming competitions during highschool. Also have been a tutor in informatics club, teaching younger students, organizing them contests and setting the problems.

PROJECTS

MakeSchedule (github) - simple but elegant site to create the most optimal course schedule based on preferences. Created with my friend. Coded in HTML, CSS, Bootstrap, Javascript, JQuery for front-end and Python, Flask for back-end.

EXTRA

Languages: English (conversational), Russian / Kazakh (native)
Competitive programming profiles: Codeforces, Topcoder, Hackerrank
